Sounds good, Andy.

Stay safe.

Hi Brent,

Thank you for your response. I hope all is well with you and yours as well. Please let us know what date you will be on site to start as we plan to be out there then as well. Our groundwater sampling is currently scheduled to begin on April 27. We do not have a date set yet for drilling as data collected during the first phase will help guide the soil boring work. We'll let you know when we are ready to schedule the drilling work so that the additional equipment relocation can be coordinated.

Best Regards,

Andy

Hi Andy,

I hope that all is well with you and yours and that everyone is keeping safe.

Yes, as it stands right now we have one of our technicians that is familiar with the site heading out there. We thought the event was planned for the week of April 27 so our technician will be out there then [probably a few days earlier] to start the work. Do you have a date yet when you expect the rig to be on site?

Cheers,

Brent

Hi Brent,

I just thought I would take the opportunity to follow up on this. Per the April 13 memo, please provide a schedule as to when the temporary equipment relocation work for the first sampling phase can be completed in order for the groundwater sampling to begin on or before April 30 as instructed by USEPA. We are set up to conduct the first phase sampling the week of April 27. Let me know if you have any questions.

Best Regards,

Andy

Dear Brent,

Attached please find a memorandum related to the temporary relocation of ERH equipment in the DNAPL Containment Area of Third Site to facilitate groundwater sampling in that area. Let us know if you have any questions.

Best Regards,

Andy
